Outcomes of the 16th Berlin Open Access Conference

B16 Final Statement

- The global open access transition must advance at a far greater pace.
- Inequity is incompatible with scholarly publishing.
- Academic self-governance is an imperative in scholarly publishing.
- **Author choice and author rights must be fully enabled.**

Outcomes of the 16th Berlin Open Access Conference

Author choice and author rights must be fully enabled.

We strongly support retention of copyright and all rights therein by authors. Open access agreements with publishers should stipulate that authors only grant “limited” or “non-exclusive” licenses to publishers, and liberal Creative Commons (CC) licenses (e.g., CC-BY) should be applied as the default choice. In keeping with the spirit and goals of open access, more restrictive CC licenses (e.g., CC-BY-NC, CC-BY-ND, and CC-BY-NC-ND) should function as originally intended, in respect of the author’s disciplinary needs; consequently, **author “license to publish” agreements should not limit the author’s rights in any way.** The author’s choice of license should not affect the price of publication services.
