

PUBLISHERS USE "LICENSE TO PUBLISH" AGREEMENTS TO TRY TO SEIZE ALL RIGHTS HELD BY AUTHORS, WHICH CONTRAVENES THE SPIRIT AND GOALS OF OPEN ACCESS

Richard A. Schneider, PhD Department of Orthopaedic Surgery, UCSF, San Francisco, CA 94143 rich.schneider@ucsf.edu

OVERVIEW AND STATEMENT OF PROBLEM

Authors choose open access (OA) publishing to accomplish two equally important goals. First, in direct opposition to the subscription system that keeps scholarly works locked behind a paywall, authors choose to make their scholarly works freely available to all. Second, authors want to regain control over their rights as creators of scholarly works—rights they have been routinely required to give away under the subscription system such that publishers can maintain exclusive control over the re-use, distribution, translation, and monetization of those works.

In 2019 at the University of California (UC), eight committees of the faculty-led Systemwide Academic Senate, as well as the Systemwide Academic Council, Council of University Librarians (CoUL), and Systemwide Library and Scholarly Information Advisory Committee (SLASIAC) all unanimously endorsed a Declaration of Rights and Principles to Transform Scholarly Communication, which was created by the faculty of the University Committee on Library and Scholarly Communication (UCOLASC).2 When endorsing the UCOLASC Declaration of Rights and Principles, these governing bodies understood that the very first principle (and the 5th and 7th) explicitly expressed the faculty's deeply held desire to control their own rights as authors.

Despite the clear intentions of UC faculty, contrary to the spirit of the Creative Commons licensing system that the UC and almost all others around the world have adopted, and plainly contradicting claims by publishers to support OA and the rights of authors, most publishers are requiring authors to sign license to publish (LTP) agreements that attempt to grant all rights associated with copyright exclusively to the publisher. Some of these LTP agreements also state explicitly that such license grants apply to any earlier version of the work held in public repositories and/or pre-print servers, and thus they try to limit the ability of downstream entities to re-use the work or mine text and data. This now-common practice is unacceptable and authors become livid once they begin to understand what is happening with these LTP agreements.

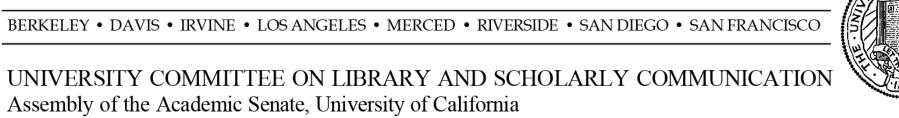

For these reasons, the UCOLASC has issued a unanimous statement on author rights and LTP agreements, and has urged the UC team that is negotiating transformative open access agreements with publishers to prioritize the issue of author rights.3

We encourage everyone to prioritize the issue of author rights in negotiations....

Authors Retaining Copyright And All Rights Therein Is A Key Motivator For Open Access Publishing

13 April 2018

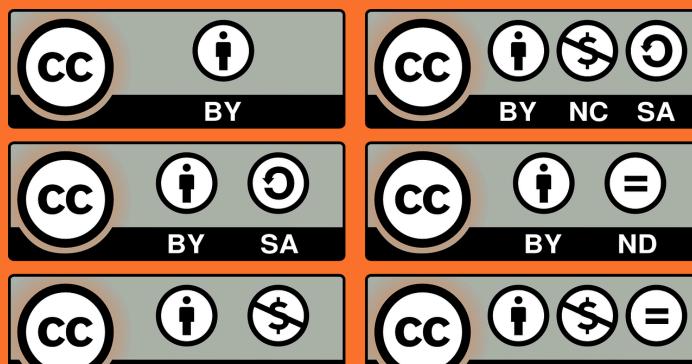

DECLARATION OF RIGHTS AND PRINCIPLES TO TRANSFORM SCHOLARLY COMMUNICATION

To align our institutional policies and practices toward the goal of replacing subscription-based publishing with open access (OA), we propose that the University of California assert the following rights and principles when negotiating with publishers during journal license renewals:

- 1. No copyright transfers. Our authors shall be allowed to retain copyright in their work and grant a Creative Commons Attribution license of their choosing.
- 5. No limitations on author reuse. Our authors shall have the right to reuse figures, tables, data, and text from their published work without permission or payment.
- 7. No curtailment of copyright exceptions. Licenses shall not restrict, and should instead expressly protect, the rights of authors, institutions, and the public to reuse excerpts of published work consistent with legal exceptions and limitations on copyright such as fair use.

3 out of 18 principles in the UCOLASC Declaration focus on copyrights for authors

The OA Movement Has Promoted Creative Commons (CC) Licenses So Authors Can Retain Copyrights And Control How Their Work Gets Used

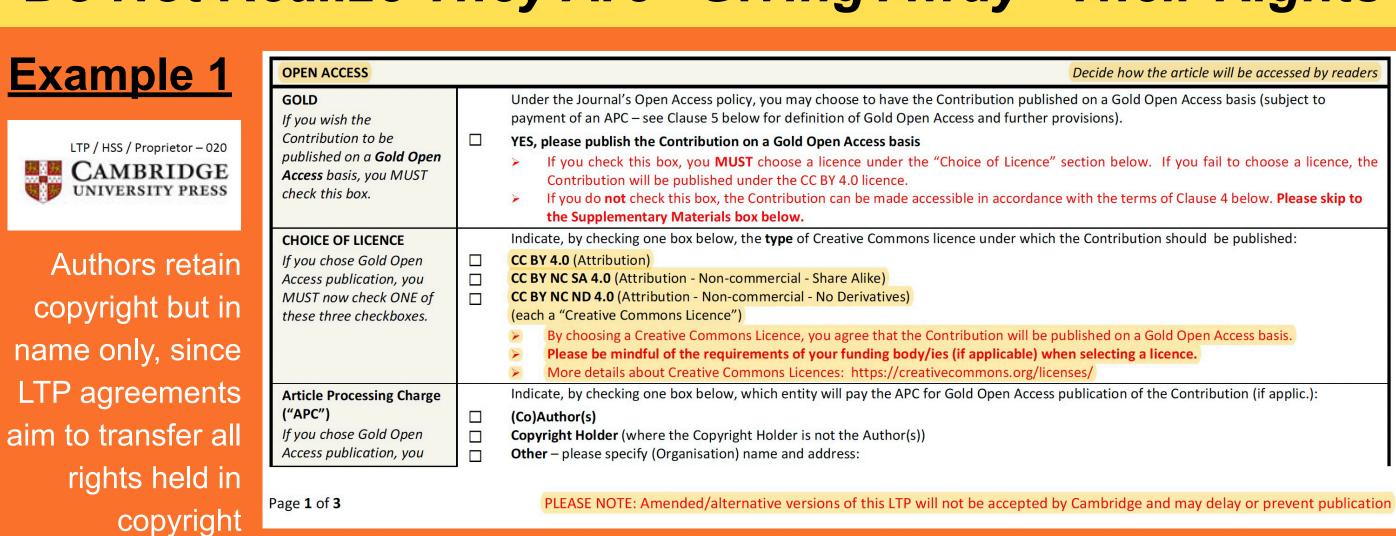

- **CC** Denotes that the license is Creative Commons.
- BY Means "by". End users must attribute and say who made the work. **NC** Non-commercial. The work cannot be used for profit.
- **SA** Share-alike. All derivatives/reuse must apply same CC license.
- **ND** No derivatives. No changes or alterations can be made to the work.

- CC licenses only restrict what end-users may do under the license and not what the licensor (rights holder) can do.4
- Licensors are always free to do whatever they want with their own works.
- One of the most liberal licenses is CC BY, which allows anyone to distribute, remix, adapt, and build upon the material in any medium or format, so long as proper attribution is given to the author.
- For discipline-specific reasons, some authors place "non-commercial" (NC) and/or "no derivatives" (ND) restrictions on what end-users can do with the work.

Authors Choose Different Creative Commons (CC) Licenses Based On Their Own Disciplinary Needs

• In 2021, up to 35% of UC authors selected CC BY-NC or CC BY-NC-ND licenses when publishing OA in gold and hybrid journals, which represents over 2300 articles (data from Unpaywall).

The Structure And Language Of License To Publish Agreements Confuse And Mislead Authors Who Often Do Not Realize They Are "Giving Away" Their Rights

1.1 The term "Contribution" means the article written by the (Co)Author(s) as Authors believe that CC licenses enable them to

LTP agreements often ask authors to sign before the

retain their rights.

exclusively to the

publisher.

STANDARD TERMS AND CONDITIONS The (Co)Author(s) and the Copyright Holder hereby agree to be bound by the following terms and conditions: 1 LICENCE

identified on page one of this LTP and includes, without exception, all the following versions of the article: 1.1.1 Submitted Manuscript Under Review ("SMUR"): any version of the Contribution that is under formal review for inclusion in the Journal. 1.1.2 Accepted Manuscript ("AM"): the version of the Contribution that has been accepted for publication. This version may include revisions

resulting from peer review but may be subject to further editorial 1.1.3 **Version of Record ("VoR")**: the version of the Contribution that is formally published by Cambridge. This includes any 'FirstView article' that is formally identified as being published before the compilation of a volume or issue as long as it is citable via a permanent identifying Digital Object Identifier ("DOI"). This does not include any 'early

release article' that has not yet been fixed by processes that are still to be applied, such as copy-editing, proof corrections, layout, and typesetting. The VoR includes any corrected or enhanced VoR. 1.2 The term "Supplementary Material" means any additional written or illustrative materials submitted or uploaded to the Journal by the (Co)Author(s) for publication in connection with the Contribution. Supplementary Material does not form part of the Contribution and will be made available in association with the Contribution in online format only. Supplementary Material may be original content created by the (Co)Author(s) ("Original SM") or it may be third-party material sourced by the (Co)Author(s) ("Third-party SM")

1.3 In consideration for publication of the Contribution, the Copyright Holder

hereby grants to the Proprietor

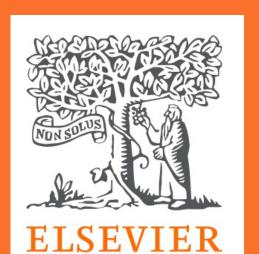

1.3.1 an exclusive licence to publish, reproduce, distribute, and sell the languages throughout the world, whether print, digital / electronic, whether now known or hereinafter invented, and to grant sublicences of all translation and subsidiary rights; an exclusive licence to exploit all other rights in the nature of

copyright, including rental, lending and database rights and all other publishing and print on demand rights in the Contribution; a non-exclusive licence to publish, reproduce, distribute, and sell the Original SM or any part of it in all forms and media and in all languages throughout the world, whether print, digital / electronic, whether now known or hereinafter invented, and to grant sublicences of all translation and subsidiary rights; and

a non-exclusive licence to exploit all other rights in the nature of copyright, including rental, lending and database rights and all other publishing and print on demand rights in the Original SM. 1.4 The licences described in Clause 1.3 above shall, throughout this LTP, be referred to collectively as the "Licence".

Example 2

fine print appears.

THE LICENSE AGREEMENT

I hereby grant to Journal Owner an exclusive publishing and distribution license in the manuscript identified above and any tables, illustrations or other material submitted for publication as part of the manuscript (the "Article") in print, electronic and all other media (whether now known or later developed), in any form, in all languages, throughout the world, for the full term of copyright, and the right to license others to do the same, effective when the Article is accepted for publication. This license includes the right to enforce the rights granted hereunder against third parties.

I understand that I retain the copyright in the Article and that no rights in patents, trademarks or other intellectual property rights are transferred to the Journal. As the author of the Article, I understand that I shall have: (i) the same rights to reuse the Article as those allowed to third party users of the Article under the CC-BY-NC-ND License, as well as (ii) the right to use the Article in a subsequent compilation of my works or to extend the Article to book length form, to include the Article in a thesis or dissertation, or otherwise to use or re-use portions or excerpts in other works, for both commercial and non-commercial purposes. Except for such uses, I understand that the license of publishing rights I have granted to the Journal gives the Journal the exclusive right to make or sub-license commercial use.

Publishers Only Need A "Limited" Or "Non-Exclusive" License To Publish 5 And Authors Retain All Rights

Example 3

INTERNATIONAL Most native OA publishers and some society publishers use an appropriate

"non-exclusive"

LTP agreement

OPEN ACCESS AGREEMENT: CC BY-NC-ND

License of Publishing Rights

The Owner hereby grants to SAE International a non-exclusive publishing and distribution license in the manuscript identified above and any tables, illustrations, or other material submitted for publication as part of the manuscript (the "Article") in all forms and media (whether now known or later developed), throughout the world, in all languages, for the full term of copyright, effective when the Article is accepted for publication. This license includes the right to enforce the rights granted by this license against third parties and to sublicense such rights.

Permission to Publish

In order to facilitate dissemination of the Article, the Owner grants to SAE, during the full term of the Owner's copyright and any extensions or renewals, a non-exclusive license to publish the Article, and all rights therein, including but not limited to the right to publish, republish, transmit, sell, distribute, and otherwise use the Article in whole or in part in electronic and print editions of the Journal and in derivative works throughout the world, in all languages and in all media of expression now known or later developed and to license or permit others to do so.

RECOMMENDATIONS AND ACTION ITEMS

- Institutions and publishers should support the retention of copyright and all rights therein by authors.
- Licenses to publish should only restrict what end-users may do under the license and not what the licensor (rights holder) can do.
- Transformative open access agreements should stipulate that authors only grant "limited" or "non-exclusive" licenses to publishers.
- Liberal Creative Commons (CC) licenses (e.g., CC BY) should be applied as the default choice in transformative agreements, but if authors choose licenses that restrict commercial and/or derivative uses of the work (e.g., CC BY-NC, CC BY-ND, CC BY-NC-ND) then those licenses should function as originally intended with authors always free to do whatever they want with their own work.
